DETAILED ACTION

Election/Restrictions

1. Claims 9-14 and 21-28 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on March 14, 2005.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

4. Claims 1-8 and 15-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sheldon et al., US 6,708,205 in view of Smith, US 5,974,085.

Sheldon discloses a transaction for multiple entities, e.g. col. 7, lines 40-57, a notification interface, e.g. user device, e.g. 30, notification identifiers, e.g. delimiters, that enables the notification interface to uniquely identify the usr. Sheldon does not explicitly disclose a router.

Smith discloses, e.g. Fig. 4, notifications having unique product identifiers, e.g. 404, transmitted via a router, e.g. 232, and an accessibility status, e.g. 242.

To have provided a router to have transmitted notification identifiers for multiple entities for Sheldon, would have been obvious to one of ordinary skill in the art in view of Smith. The motivation for having done such would have been to implement common knowledge computer technology and know-how to forward the data of Sheldon.

5. Further pertinent references of interest are noted on the attached PTO-892.
6. Applicant's Information Disclosure Statement received January 16, 2002 has been reviewed. See the attached IDS.
